Notes

Need to get creative for the bullet-point time indicator

Really need to get the margin space to be more reader friendly **(INCREASE!)**

Realize font-positioning should definitely not have been vertically centered

Should I add project specific pages for the "More details" buttons?

Notes
Consider tight width left-bound for readability in development

Ubuntu is easier on the eyes for body text

Increase word spacing

Formalize margins in design

Heading icon size should be identical to font size

Increase bullet line height

Display component showcase?
